Vertical Aerospace secures pre-delivery payment commitment from American Airlines

- Vertical Aerospace has secured a pre-delivery payment commitment from a major customer;
  American Airlines confirms delivery slots for 50 VX4 eVTOL aircraft
- American placed a conditional pre-order of up to 250 VX4s with an additional 100 options in June 2021
- Together, Vertical and American will build upon their existing joint working group to collaborate on
  a framework for exploration of the future of advanced air mobility and potential markets for eVTOL
  operations in the United States
- The piloted VX4 electric aircraft will fly four passengers with zero operating emissions, minimal noise
  and at distances of over 100 miles

London, UK & New York, USA – 15 July 2022
Vertical Aerospace (Vertical) [NYSE: EVTL], a global aerospace and technology company that is pioneering
zero-emissions aviation, today announces that it has confirmed delivery slots and the commitment of
associated pre-delivery payments with American Airlines (NASDAQ: AAL).

American has reserved delivery slots for the first 50 VX4 aircraft of its initial conditional pre-order of up to
250 aircraft, with an option for an additional 100, announced in June 2021. The parties will build upon their
existing joint working group to collaborate on a framework to explore the future of advanced air mobility
and prepare for the VX4’s entry into service.

The commitment to pay pre-delivery payments and confirmation of slot reservations for the first 50 aircraft is
believed to be the first of its kind for a major airline in the eVTOL industry, and it marks a significant milestone
in the partnership between American and Vertical.

Today’s announcement follows the recent news of a further 50 conditional pre-orders of the VX4 from
FLYINGGROUP, establishing Molicel as its battery partner, and agreeing to concurrent certification with
the European Union’s Aviation Safety Agency (EASA) and the UK’s Civil Aviation Authority (CAA).
Stephen Fitzpatrick, Founder & CEO of Vertical said “We are delighted to have reached this major milestone with American Airlines on our eVTOL partnership. Together, we are making zero-emissions flight a reality for passengers travelling all over the world. We look forward to continuing our work with American and seeing the first red, white and blue VX4 come off the production line.”

“Our partnership with Vertical is a great example of progress in our commitment to reducing carbon emissions throughout our airline and the industry,” said American’s Chief Financial Officer Derek Kerr. “We have made great strides in simplifying our fleet with newer and more fuel-efficient aircraft, and are proud to take part in another step toward the development of advanced air mobility.”

About Vertical Aerospace
Vertical Aerospace is pioneering electric aviation. The company was founded in 2016 by Stephen Fitzpatrick, an established entrepreneur best known as the founder of the Ovo Group, a leading energy and technology group and Europe’s largest independent energy retailer. Over the past five years, Vertical has focused on building the most experienced and senior team in the eVTOL industry, who have over 1,700 combined years of engineering experience, and have certified and supported over 30 different civil and military aircraft and propulsion systems.

Vertical’s top-tier partner ecosystem is expected to de-risk operational execution and its pathway to certification allows for a lean cost structure and enables production at scale. Vertical has a market-leading pre-order book by value for 1,400 aircraft from global customers creating multiple potential near term and actionable routes to market. Customers include American Airlines, Virgin Atlantic, Avolon, Bristow, Marubeni, Iberojet and FLYINGGROUP, as well as Japan Airlines (JAL), Gol, Air Greenland, Gozen Holding and AirAsia, through Avolon’s VX4 placements.

Vertical’s ordinary shares and warrants commenced trading on the NYSE in December 2021 under the tickers “EVTL” and “EVTLW,” respectively.

About the VX4 eVTOL Aircraft
The VX4 is projected to be capable of transporting a pilot and up to four passengers, traveling distances of over 100 miles, and achieving top speeds of over 200 miles per hour, while producing minimal noise and zero operating emissions. The VX4 is expected to open up advanced air mobility to a whole new range of passengers and transform how we travel. Find out more: vertical-aerospace.com

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any express or implied statements contained in this press release that are not statements of historical fact may be deemed to be forward-looking statements, including, without limitation, statements regarding the certification and the commercialization of the VX4 and related timelines, the differential strategy compared to its peer group, and the transition towards a net-zero emissions economy, expected financial performance and operational performance for the fiscal year ending December 31, 2022, as well as statements that include the words "expect," "intend," "plan," "believe," "project," "forecast," "estimate," "may," "should," "anticipate," "will," "aim," "potential," "continue," "are likely to" and similar statements of a future or forward-looking nature. Forward-looking statements are neither promises nor guarantees, but involve known and unknown risks and uncertainties that could cause actual results to differ materially from those projected, including, without limitation: Vertical's limited operating history without manufactured non-prototype aircraft or completed eVTOL aircraft customer order; Vertical’s history of losses and the expectation to incur significant expenses and continuing losses for the foreseeable future; the market for eVTOL aircraft being in a relatively early stage; the potential inability of Vertical to produce or launch aircraft in the volumes and on timelines projected; the potential inability of Vertical to obtain the necessary certifications on the timelines projected; any accidents or incidents involving eVTOL aircraft could harm Vertical’s business; Vertical's dependence on partners and suppliers for the components in its aircraft and for operational needs; the potential that certain of Vertical’s strategic partnerships (including for pilot training) may not materialize into long-term partnership arrangements; pre-orders Vertical has received for its aircraft are conditional and may be terminated at any time in writing prior to certain specified dates; any potential failure by Vertical to effectively manage its growth; the impact of COVID-19 on Vertical’s business; Vertical has identified material weaknesses in its internal controls over financial reporting and may be unable to remediate the material weaknesses; Vertical’s dependence on our senior management team and other highly skilled personnel; as a foreign private issuer Vertical follows certain home country corporate governance rules, is not subject to U.S. proxy rules and is subject to Exchange Act reporting obligations that, to some extent, are more lenient and less frequent than those of a U.S. domestic public company; and the other important factors discussed under the caption “Risk Factors” in our Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission (“SEC”) on April 29, 2022, as such factors may be updated from time to time in Vertical’s other filings with the SEC. Any forward-looking statements contained in this press release speak only as of the date hereof and accordingly undue reliance should not be placed on such statements. Vertical disclaims any obligation or undertaking to update or revise any forward-looking statements contained in this press release, whether as a result of new information, future events or otherwise, other than to the extent required by applicable law.
